

Press Release

Subsea Vision Purchase New Falcon ROV 27th June 2003

Subsea Vision has purchased another Seaeye Marine Falcon ROV to strengthen their ability to operate on a world wide basis. The Falcon ROV's have proved very powerful, reliable vehicles, impressing clients with their range and adaptability.

Long term hire agreements with or without personnel can be provided for, in addition to comprehensive packages with the ROV's operating as a supporting pair or individually in multiple tasks including General Visual Inspections, localized cleaning, NDT testing, Accelerated Low Water Corrosion assessments, Diver / construction support and manipulator work for the inshore, coastal and offshore Industries.

The Falcon ROV systems are easily transported by land or air for rapid mobilizations worldwide. Experienced pilots operate the systems, giving peace of mind that projects will be completed professionally.
